New 16oz Size Pouch Of Evercoat Metal Glaze

New Pouch Makes It Easier Than Ever To Dispense All Of The Material

FIB412

Metal Glaze is a two-part polyester finishing and blending putty. It can be used independently or intermixed with other MetalWorks products to enhance the working properties for adapting to various temperatures and working conditions. It offers superior adhesion to galvanized metal, metal, aluminum, body filler, wood, fiberglass, catalyzed primers and aged/sanded OEM topcoats. Use as a finish coat over body filler repair areas to fill minor defects, deep sand scratches and pinholes prior to applying primer surfacer to improve the efficiency of the primer coat. Can also be used to fill minor body damage up to 1/8" in depth.
