# CEROS

Compact Electric Random Orbital Sander **MIRKA**

## *CEROS - Compact Electric Random Orbital Sander*

Introducing the revolutionary CEROS by Mirka. Only half the size and weight of traditional electric finishing sanders, CEROS incorporates a powerful brushless DC motor that is smooth, quiet, and maintenance free.

CEROS is available in both 5" and 6" models, and uses standard backing pads with a 5/16" threaded mount. Sanders are vacuum-ready using multi-hole backing pads with hook and loop attachment.

CEROS features digitally controlled variable speeds from 4,000 to 10,000 rpm to provide the ideal finish for a variety of applications.
