

PAINTERS SUPPLY & EQUIPMENT CO.

RAIN

*Compliant Automatic Gun Cleaner Solution
For Waterborne Base Coats*

Part# **PSERAIN/GL**

Features and Benefits

- Designed to thoroughly clean difficult water based spray equipment
- Blend of solvents and detergents, when blended with water, will not separate
- For use in all Manual and Automatic spray gun cleaning equipment
- Can be used in all spray gun washers designed for waterborne coating
- Eliminates the need for multi-step cleaning procedures
- Will actually soften air dried water based coatings - Keeps equipment clean
- Packaged in concentrated gallon - easy to handle and mix
- Can be coagulated, refreshed, and re-used 2-4 times

RAIN is a cleaner/detergent for water based/waterborne colors. This solution can also be used for cleaning most acrylic or emulsion paints. It was developed for automatic spray gun cleaning equipment, but can be used for manual cleaning of spray guns and equipment.

RAIN is in a concentrated form and **MUST** be mixed according to directions to clean properly.

RAIN will produce no foam and safely dissolves waterborne color (includes partially dry color), varnish, grease, and dirt from all metal and plastic parts, and it is **NOT** abrasive or harmful to your equipment.

RAIN should not come in contact with nitrocellulose or acrylic lacquers for an extended period of time as it could soften the finish.
