### **Course Content**

#### **Module 1—Safety Data Sheets**

Explains why hazardous materials regulations were developed and covers the information found in a Safety Data Sheet (SDS). Students will learn how to interpret SDS information and how to apply it.

#### **Module 2—Labels**

Student will learn to identify and explain the different types of labels, recognize the specified elements of supplier labels, and know the difference between supplier, workplace, and "other means of identification" labels. The student will also learn requirements for a workplace label and how to make a workplace label.

#### **Module 3—Hazardous Materials**

Students will learn how to identify acute and chronic chemical exposure and know the different routes hazardous chemicals can enter into the body. They will also learn the different hazardous chemical categories and where the hazards may be located in the collision repair facility.

#### **Module 4—Personal Protective Equipment**

The student will learn about the different types of protective clothing that should be worn to protect against hazardous situations in the workplace.

#### **Module 5—Repair Facility Safety**

He or she will be able to identify unsafe work practices and make recommendations regarding the use of safe work-place practices. Safe use of tools, storage of hazardous material and the requirements for having a workplace hazardous materials training are also covered.

#### **Module 6—Hazardous Wastes**

Explanation of different types of waste and regulations surrounding hazardous waste.
