After completing this course, you will be able to:

- Understand uses and application procedures for automotive foam
- Understand structural foam considerations and curing methods
- Identify procedures related to installation of expandable foam
- Understand how to choose correct replacement materials
- Know how to work safely around automotive foams

Course Content

Module 1—Foam Uses

This module highlights the uses for vehicle foams and common structural locations. The student will be introduced to vehicle maker application and curing methods.

Module 2—Automotive Replacement Foam Types

The course continues with collision repair foam materials, their chemical make-up, and structural foam characteristics.

Module 3—Foam Safety and Repair

The course concludes with coverage on safety issues surrounding working with different forms of foam and considerations around determining replacement models
